DESCRIPTION

Amazon teams in India work on complex business challenges to innovate and create efficient solutions that enable various Amazon businesses, including Amazon websites across the world as well as support Payments, Transportation, and Digital products and services like the Kindle family of tablets, e-readers and the store. We are proud to have some of the finest talent and strong leaders with proven experience working to make Amazon the Earth's most customer-centric company.
At a strategic level, our development team will be instrumental in shaping the product direction and will be actively involved in defining key product features that impact the business.

We are looking for a passionate, hard-working, and talented Software Development Engineer who can build innovative and mission critical system software applications and tools. You will have an enormous opportunity to make a large impact on the design, architecture, and development of consumer products. You will be responsible for delivery and support of large-scale, multi-tiered, distributed software applications and tools.

Responsibilities Include
Ability to design and code right solutions starting with broadly defined problems.
Drive best practices and engineering excellence.
Work with other team members to develop the architecture and design of new and current systems.
Work in an agile environment to deliver high quality software.
